

Name	Max Rennie	Email	Maxfrennie123@gmail.com
Location	Ipswich, Suffolk	Mobile	07447685935
LinkedIn	linkedin.com/in/max-rennie/		
Profile	<p>A bright, friendly team-player; inherently energetic and prepared to go the extra mile. Strong interpersonal skills gained from experience in restaurant FOH positions. I am more than comfortable working in, and leading, a team because of a medley of my previous roles, however I have never struggled to work autonomously.</p> <p>My experience in positions of production and maintenance engineering have given me a strong understanding of process control and alteration, as well as the importance of good planning and project management. As a result, in the future I wish to pursue supplementary qualification in management and leadership. A successful internship at an award-winning creative agency in Suffolk gave me a phenomenal grasp of the exciting and rewarding environment that web development provides. Working in a team of 7 developers and embracing an agile management methodology, I feel I have pushed my boundaries from being a graduate developer to that of a junior who is ready to help another team succeed.</p>		
Employment History	<p>Web Development and Design Freelancer Self-employed June 2022 – Present</p> <p>Using core development skills refined at my internship, I primarily support a local business with maintenance tasks on their WordPress Sites. I've also consulted on design and branding for a variety of projects.</p> <p>Junior Developer StrategiQ Marketing Ltd May 2022 – November 2022</p> <p>Supported the Senior Developers at StrategiQ, I assisted with the development and maintenance of client sites, mainly using the company's custom theme to undertake block-based development while conforming to the various processes in place in their production workflow. Programming primarily with JS, PHP, SCSS and Vue.JS, I gained great real world experience to build upon the theoretical foundation I have gained whilst at university.</p> <p>Bar Team Member The Steamboat Tavern August 2020 – Present</p> <p>Gained employment at a pub and music venue to supplement my income whilst I study, I quickly integrated myself into the team and the community. I am also a key holder of the business and run events at the venue.</p> <p>Test Engineering Technician Tesla Engineering Ltd. January 2019-June 2020</p> <p>Joining a leading British Manufacturer in an electro-mechanical technical role. Following a promotion to Test and Service engineering technician I tested the persistent and resistant superconducting magnets that Tesla Engineering produce. Main roles were management of the Test area, routine maintenance on a variety of test equipment, taking magnets through their full testing procedure and solo installation on client's sites. Teamwork is a large part of working at Tesla, the work I performed required coordination between production, design, and project management to make sure that manufacture and improvement</p>		

of the product is of the highest quality.

Front of House Staff

Various Businesses

October 2016 - December 2018

Engineering cadet

Tarmac Dredging Ltd

2013-2016

**Education
and Training**

University of Suffolk

BSc Web and Mobile Development

Grade: 2:1

Dissertation: 72%

2020 – 2023

Pursuing a career in technology, I have quickly gained skills in HTML, CSS, JavaScript, React, React Native, PHP, MySQL, Java and C#, whilst also refining my analytical abilities and core computing knowledge, for example gaining 100% in my Algorithms and Data Structures module in my first year.

I am also the course representative for my cohort and take an active stance in ensuring I get the most out of my time at university, frequently working with members of the university's staff to improve the current course and for future students.

Taking vast enjoyment in the code-centric modules as opposed to writing essays, I have given myself an exceptionally strong foundation in HTML, CSS, SCSS, JavaScript, PHP and MySQL, as well as design of websites, including the functionality supporting them.

Warsash Maritime Academy/Solent University

BTEC Level 5 HND in Marine Engineering

Engineering Officer of the Watch

2013-2016

**Hobbies and
interests**

To supplement the learning within my degree am I refining skills in JavaScript with online coding challenges. I have built a keen interest WordPress Development, where I currently experimenting with my own block-based development theme. I plan to also investigate headless development in the future.

I am keen to progress my design skills, particularly in copywriting and graphic design – intending to take short courses within these disciplines.

To relax - I am usually found cooking something up in the kitchen, however my latest project has been to make my own drum barbecue. The rest of my time I fill with reading, walking, and tinkering with anything mechanical I find.
